## Microorganisms

Main sol. 2		
Main sol. 1	1000.00	ml
Urea	20.00	g/l

1. To medium 1 add 20 g/l urea before autoclaving. Do not adjust pH; pH raises to about 8 due to heat degraded urea.

2. For sporulation enhancement add 10 mg/l  $MnSO_4 \times H_2O$ .
