

## Substrate

Sodium palmitate

2.80

g

1. Autoclave in culture vessels.
2. To complete the medium, combine Solution A and substrate in the culture vessels under a  $N_2$ - $CO_2$  (4:1, v/v) gas mixture and seal with butyl rubber stoppers. Finally, reduce the medium with 0.01 volume of 5%  $Na_2S \times 9H_2O$  solution (autoclaved and stored under a  $N_2$  atmosphere).
