

## Main sol. 246 (from medium 246)

Beef extract	10.00	g
Peptone	10.00	g
Agar	20.00	g
Tap water	250.00	ml
Sea water	750.00	ml

1. Dissolve beef extract and peptone by heating in tap water, adjust pH to 7.8 and boil for 10 min. Readjust pH to 7.3. Add agar and autoclave at 121°C for 20 min. Directly after autoclaving, add warm (55°C) sterile sea water. Liquid medium without agar should be combined when cooled to room temperature.

2. Natural sea water is stored in the dark for at least three weeks to "age". If natural sea water is not available use artificial sea water.
