

Mail sol. C₃₁

Part 1	500.00	ml
Natural sea water (filtered and autoclaved)	500.00	ml

1. This medium is made up in 2 parts which are autoclaved separately at 15 psi and mixed aseptically (1:1), when cool. This avoids precipitation.
2. Alternatively, use 17.5g of "Ultramarine Synthetica" sea salts in 500ml of distilled water.
