

1: NUTRIENT AGAR

This recipe contains strain-specific modifications for *Methylovorus sp.* DSM 11726 *

Final pH: 7.0

Final volume: 1000 ml

| | | |
|------------------------|---------|--------|
| Peptone | 5.00 | g |
| Meat extract | 3.00 | g |
| Agar, for solid medium | 15.00 | g |
| Methanol | 1.00 | %(v/v) |
| Distilled water | 1000.00 | ml |

1. Adjust pH to 7.0.
2. For Bacillus strains the addition of 10.0 mg $\text{MnSO}_4 \times \text{H}_2\text{O}$ is recommended for sporulation.

* With 1% v/v methanol
