## **Microorganisms**

## 693: COLUMBIA BLOOD MEDIUM

This recipe contains strain-specific modifications for Neisseria meningitidis DSM 10036 \*

Final volume: 1000 ml

| Columbia agar base       | 1000.00 | ml |
|--------------------------|---------|----|
| Defibrinated sheep blood | 5.00    | %  |

1. Columbia agar base supplemented with 5% defibrinated sheep blood. Rehydrate pellets of freeze-dried ampoules in liquid medium 545, 215 or 1 (see below).

2. ATTENTION: organisms, for which only M 693 is mentioned in the catalogue entry, do not grow in one of the media listed below! Those are meant to rehydrate the freeze-dried pellets, not for cultivation.

## \* Requires high humidity

| 545. TRYPTONE SOYA BROTH (TSB) (from | n medium 54a) |    |
|--------------------------------------|---------------|----|
| Casein peptone                       | 17.00         | g  |
| Soy peptone                          | 3.00          | g  |
| D(+)-Glucose                         | 2.50          | g  |
| NaCl                                 | 5.00          | g  |
| K <sub>2</sub> HPO <sub>4</sub>      | 2.50          | g  |
| Distilled water                      | 1000.00       | ml |

1. Adjust pH to 7.3.

2. The same as Caso Bouillon (Merck or Oxoid, Germany).

| 215. BHI MEDIUM (from medium 429)              |         |    |
|--|---------|----|
| Brain heart infusion (Difco)                   | 37.00   | g  |
| Distilled water                                | 1000.00 | ml |
| 1. NUTRIENT BROTH (from medium 429)<br>Peptone | 5.00    | g  |

| Peptone         | 5.00    | g  |
|-----------------|---------|----|
| Meat extract    | 3.00    | g  |
| Distilled water | 1000.00 | ml |

Adjust pH to 7.0.
